

WHITE PAPER

ISO 45001:2018

Occupational Health and Safety
Management System

A comprehensive international
standard for health & safety

Success through management excellence

Global Standards is happy to guide about Occupational Health and Safety Management - ISO 45001:2018 in a way that can easily be understood. The needs of OHSMS is the most desirable thing during Occupation and Employment seeking to have a standard through which Health and Safety can be secured from any undesirable incident

In this white paper the benefits and features have been Defined

OHSMS - ISO 45001 is the replacement of BS OHSAS 18001:2007 standard following the same requirements of health and safety dueing occupation with additional requirements of 'risk-based thinking' and 'Annex-SL'.

The ISO 4001:2018 OHSMS standard has become an international reference for Health & Safety management requirements.

ISO 45001 is an international occupational health and safety management system specification. These specifications are back to risk based thinking and Annex-SL for the formation of high level integration with other ISO standards. i.e. *ISO 9001, ISO 14001.*

The OHSMS specification is applicable to any organization that wishes to:

- * Establish an OH&S management system to eliminate or minimize risk to employees and other interested parties who may be exposed to activities with OH&S risks
- * Assure compliance with its own OH&S policy
- * Demonstrate such compliance to the stakeholders
- * Implement, maintain and continually improve an OH&S management system
- * Make a self-determination and declaration of compliance with this OHSAS specification.
- * Seek third party independent certification of its OH&S management system

An OHSMS ISO 45001 audit assists in a variety of business respects. It helps to minimize risk to employees and other interested parties; improve an existing OH&S management system; demonstrate Diligence; gain assurance; among others. The Occupational Health and Safety Management System supports organizations to create a culture of safety and maintain business sustainability.

BENEFITS OF ISO 45001 STANDARD

- * Internationally recognized and accepted standard
- * Easily assessed with existing management systems
- * Skilled auditors who are trained for various systems
- * Consistency in HS system stability
- * Duplication of similar elements of each standard is Avoided
- * Increase reputation for customer by taking the risk assessments against the occupational hazards of health & safety
- * Creditability and reliability for customer to increase job orders
- * Reduce the cost of nonconformities
- * Minimize injuries during occupation .

Global Standards utilizes its entire efforts for the regulatory requirements of health & safety with the accordance of countries act.

Global Standards has professionalism for handling the major requirements of this standard to minimize the associated risk factors of hazards relevant to occupation with suitable and easy operational control.
